

MORATORIUM STREETS*:

PLANNED STREETS*:

*NOTES

- SEE SHEET 7 FOR COMPLETE LISTING OF STREETS SUBJECT TO MORATORIUM AND STREETS PLANNED TO BE PAVED OR SLURRY SEALED IN 2023-2024.
- 2. STREETS PLANNED TO BE RESURFACED OR SLURRY SEALED IN FUTURE YEARS AS OUTLINED ON THIS EXHIBIT ARE SUBJECT TO CHANGE. CONTACT THE CITY OF DANA POINT PUBLIC WORKS DEPARTMENT FOR VERIFICATION OF WHEN STREETS WILL BE RESURFACED OR SLURRY SEALED.

Per the City of Dana Point Municipal Code, Section 14.01.540 (c) "Specifications for Resurfacing:"

Moratorium on Newly Paved Streets. The City does not allow street cuts on streets that have been newly paved or resurfaced for a period of five (5) years unless an emergency to public health and safety exists. If a street with a moratorium is cut for any reason, the required asphalt repairs will be per the City Engineer. In most cases, the street will need to be entirely resurfaced with a minimum two (2) inch overlay from curb to curb in the area of work. In streets where a moratorium exists, the City Engineer may allow tunneling as an alternative to street cuts as long as there is enough space outside the paved surface to accommodate the tunneling operation. Tunneling will not be allowed in a street where a moratorium exists if the asphalt concrete pavement surface will be impacted. All damage caused during the work shall be repaired in kind within five (5) working days from the completion of work.

Moratorium on Newly Slurry Sealed Streets. The City does not allow street cuts on streets that have been recently slurry sealed for a period of one (1) year unless an emergency to public health and safety exists. If a slurry seal street with a moratorium is cut for any reason, the required asphalt repairs will be per the City Standard Encroachment Permit Details and as modified by the City Engineer.

Vista Del Mar	Calle Del Sol to Camino Del Estrella	2023	Slurry	Slurry Seal FY 22/23

STREETS PLANNED TO BE RESURFACED OR SLURRY SEALED IN FUTURE YEARS AS OUTLINED ON THIS EXHIBIT ARE SUBJECT TO CHANGE. CONTACT THE CITY OF DANA POINT PUBLIC WORKS DEPARTMENT FOR VERIFICATION OF WHEN STREETS WILL BE RESURFACED OR SLURRY SEALED.

Per the City of Dana Point Municipal Code, Section 14.01.540 (c) "Specifications for Resurfacing:"

Moratorium on Newly Paved Streets. The City does not allow street cuts on streets that have been newly paved or resurfaced for a period of five (5) years unless an emergency to public health and safety exists. If a street with a moratorium is cut for any reason, the required asphalt repairs will be per the City Engineer. In most cases, the street will need to be entirely resurfaced with a minimum two (2) inch overlay from curb to curb in the area of work. In streets where a moratorium exists, the City Engineer may allow tunneling as an alternative to street cuts as long as there is enough space outside the paved surface to accommodate the tunneling operation. Tunneling will not be allowed in a street where a moratorium exists if the asphalt concrete pavement surface will be impacted. All damage caused during the work shall be repaired in kind within five (5) working days from the completion of work.

Moratorium on Newly Slurry Sealed Streets. The City does not allow street cuts on streets that have been recently slurry sealed for a period of one (1) year unless an emergency to public health and safety exists. If a slurry seal street with a moratorium is cut for any reason, the required asphalt repairs will be per the City Standard Encroachment Permit Details and as modified by the City Engineer.
